

An Introduction to miRNA and siRNA

29 April 2010

This one day course aims to provide an introduction to miRNA and siRNA, approaches to experimental design and optimisation and practical experience of miRNA analysis in the laboratory.

Overview:

- Introduction to miRNAs
- Experimental overview and isolation and enrichment of miRNAs
- miRNA expression profiling, verification and normalisation of data
- miRNA laboratory practical and data analysis
- New approaches to miRNA discovery
- An introduction to siRNAs and optimisation of siRNA transfection
